

Spotted wing drosophila **solutions** from Russell IPM

SWD Dry Lure, MaxDro & Suzukii Trap

The SWD Dry Lure and MaxDro (liquid lure) are highly attractive lures for monitoring of SWD. SWD Dry Lure is a versatile attractant that can be paired with the Red Impact Trap or hung inside the Suzukii Trap. MaxDro is a liquid attractant for the mass monitoring of SWD. It can be paired with the Suzukii trap and SWD Dry Lure to maximise trap catch.

ProBandz®

ProBandz is an effective food bait adjuvant which is mixed with insecticides to enhance the control of fruit flies such as SWD. It increases the uptake of insecticide which leads to a faster kill of the target pest with a much reduced insecticide rate. It can be used with all authorised plant protection products and is applied to plants as a band treatment.

- ✓ 50% reduction in active ingredient costs (estimate)

Red Impact Board with SWD Dry Lure

Red Impact Board is a ready-to use, quick and effective monitoring tool for SWD when paired with the SWD Dry Lure. It comes with UV- light stable, high-tack adhesive for easy capture of SWD.
