Lighting the way to a better crop

Assembly

- Unscrew the lid and carefully pour 100-150ml of lure into the trap.
- Locate the switch on the inside of the lid and select "ON".
- The LED light will illuminate in the absence of daylight.
- Screw the lid back onto the trap and use the metal handle to hang.
- Avoid obstructing the traps entry points and solar panel.
- When replacing the lure ensure the old liquid is removed from the field area.
- For adult use only.
